Safety instructions

⚠️ To protect you from electrical shocks, injury or burns the following basic safety principles must be observed when using electrical devices. Please read and follow these instructions before using the device.

Installation

Ensure that the devices are positioned safely and cannot fall down or over. Always position the cables to ensure they do not pose a tripping hazard. Do not expose electrical devices to rain. Do not operate electrical devices in damp or wet environments. Do not operate electrical devices close to flammable liquids or gases. Position the devices so that they are out of the reach of children.
Protection against an electrical shock
Only operate devices whose casings and cables are undamaged. Ensure the cables are installed safely. Do not pull on the cables.

Use
Do not use electrical devices for purposes other than those stated by the manufacturer.

Repairs
Do not repair or modify the device. Please contact your dealer or the Truma Service (see service manual or www.truma.com).

Accessories
Only use accessories and additional devices that are supplied or recommended by the manufacturer.

Intended use
The CP 25-UK is a digital operating / display and control unit for the Combi 4 E / 6 E.

The device is designed to be installed in caravans and motorcaravans.

Initial operation or activation after a power cut
After the operating voltage has been connected, the unit will beep and the display remains dark. To switch on, press the key and the main screen will appear.

Function description
More details regarding the operating modes you will find in the operating instruction of your Combi.

Main screen

Room temperature: Display on when the heater is active
Timer: Display on when the timer is active
Clock: Only if the clock has been set, otherwise the Truma logo will appear in the display

Status of the heater:
H: Set room temperature (e.g. 18 °C)
EG: Energy selection (E = Electro, G = Gas)
W: Set water temperature
Selection key upwards to select functions or set values
Selection key downwards to select functions or set values
Selection key backwards to select values
Selection key forwards to select values

On / Off

- Display and heater is switched on and / or off
- The clock is shown when the time is set
- After an interruption in the operating voltage, the display and the heater are switched off. If the time is shown, this needs to be set.

Green LED shines when the heater is on
Green LED flashes when the heater is after-running
Red LED shines when there is a malfunction

Manual mode

- In manual mode, the heater is controlled via the 4 keys below the display.
- It is not necessary to set the time because the Truma logo is shown in the display instead of the time.

A pre-selection between summer / winter operation must be made via the setup.

Room temperature

When the menu is selected the yellow LED shines.

The current set room temperature is displayed and can be changed.

Key increases the room temperature (max. 30 °C) by 1 °C
Key reduces the room temperature (min. 5 °C) by 1 °C

A change in the room temperature needs to be confirmed with .
Energy selection

When the menu is selected the yellow LED shines.

Depends on summer / winter operation (see setup)

- Use key ▲ or ▼ to select the energy source and confirm with ◄.
- Bar shows current mode

**Summer operation**
- 230 V – 4 A (electro mode 230 V, 900 W)
- 230 V – 8 A (electro mode 230 V, 1800 W)
- Gas powered

**Winter operation**
- 230 V – 4 A (electro mode 230 V, 900 W)
- 230 V – 8 A (electro mode 230 V, 1800 W)
- Gas powered
- 230 V – 4 A and gas (mixed operation gas and electro mode 900 W)
- 230 V – 8 A und Gas and gas (mixed operation gas and electro mode 1800 W)

If electro or mixed operations are selected and there is no 230 V power supply, the heating will not function.

Water temperature

When the menu is selected the yellow LED shines.

During the heating-up phase, the set water temperature flashes in the main screen.

- Use key ▲ or ▼ to select the water temperature and confirm with ◄.
- Bar shows current mode

Depends on summer / winter operation (see setup)

**Summer operation**
- Water 40 °C
- Water 60 °C

**Winter operation**
- Water > 0 °C (heating **without** controlled water temperature, heating has priority)
- Water 60 °C

Timer mode

- The heater runs in timer mode as soon as one or both timers have been activated in the setup
- “Timer On” appears in the main screen
- The heater is only active in the set time window (active timer)
- Only the energy selection can be changed in the case of an active timer
- A change in the room or water temperature will automatically switch the control system into manual mode
Setup

In the main screen display you can enter the setup menu via the setup key.

The following settings can be made:

- **Back** (return to main screen)
- **Timer 1 on / off** (select on / off wählen)
- **Timer 2 on / off** (select on / off wählen)
- **Summer / Winter** (select summer / winter)

Set clock

**Set timer 1**
- **Back** (Return to main screen)
- **Start** (Set start time)
- **Stop** (Set stop time)
- **Water** (Set water temperature)
- **Temp** (Set room temperature)

The timer settings can be made every day until the timer is switched off. If the room or water temperature is changed outside the timer menu, the timer is automatically switched off.

**Set timer 2**
- **Back** (Return to main screen)
- **Start** (Set start time)
- **Stop** (Set stop time)
- **Water** (Set water temperature)
- **Temp** (Set room temperature)

The timer settings can be made every day until the timer is switched off. If the room or water temperature is changed outside the timer menu, the timer is automatically switched off.

- **Buzzer on / off** (select on / off)
- **Backlight** (brightness levels 0 – 9)

If no action is taken, the display switches back to the main screen after a few seconds. The lighting switches off after a short delay.

Further information
see operating instructions Combi 4 E / Combi 6 E

Maintenance

Clean the panel with a dry and fluff-free cloth.

Disposal

The device must be disposed of in line with the administrative regulations of the respective country in which it is used. National regulations and laws (in Germany, for example, the End-of-life Vehicle Regulation) must be observed.
Technical data

Operating voltage
DC voltage 8 – 16 V

Ambient temperature
-20 °C to +60 °C

Front panel
Plastic

Width
190 mm

Height
110 mm

Depth
29 mm

Cutout dimensions
165 x 90 mm

Weight
170 g

The right to effect technical modifications is reserved!

Trouble-shooting list

<table>
<thead>
<tr>
<th>Fault</th>
<th>Rectification / Cause</th>
</tr>
</thead>
<tbody>
<tr>
<td>Clock is not shown</td>
<td>Set clock</td>
</tr>
<tr>
<td>Activated timer is not shown any more</td>
<td>Power supply was interrupted</td>
</tr>
<tr>
<td>Room temperature is not shown</td>
<td>Heater not active</td>
</tr>
<tr>
<td>Device does not react any more</td>
<td>Interrupt power supply for 10 seconds</td>
</tr>
<tr>
<td>Heater / display does not react</td>
<td>Check 12 V supply voltage</td>
</tr>
</tbody>
</table>

If these measures do not rectify the problem, please contact the next Truma Service point (see Truma service book or www.truma.com).
The installation in the vehicle must comply with the technical and administrative provisions of the respective country in which it is used (e.g. EN 1648, VDE 0100-721). National regulations and guidelines must be observed.

In other countries always observe the respectively valid regulations.

Panel

Install the panel in a place that is protected from damp and wet.

- Prepare an installation opening for the display.
- Connect the cable (TIN-Bus) to the display and lead toward the heater.
- Connect the 12 V plug and connect with the 12 V operating voltage. Secure the plus cable with a 1 A fuse.
- Connect GSM module (optional). The heater can be switched on remotely via the GSM module.

Dimensions in mm.
– Press the frame of the panel until it clicks into position.

The right to effect technical modifications is reserved!
In Germany, always notify the Truma Service Centre if problems are encountered; in other countries the relevant service should be contacted (see Truma Service Booklet or www.truma.com).

Having the equipment model and the serial number ready (see type plate) will speed up processing.
