

Press release

Aventa 2nd Generation – A masterpiece of coolness.

The new highlight in the Truma family of roof-mounted air conditioning systems

The Aventa series of roof-mounted air conditioning systems from Truma are some of the most popular air conditioning systems for motorhome owners and panel van fans. After all, they provide the perfect feel-good temperature in the vehicle at all times and have proven flexible, economical and efficient for everyday travel since their market launch. Now we present the true masterpiece of coolness with our 2nd generation of Aventa models – available from specialist retailers from spring 2025.

Made in Germany

Our systems are planned, developed, designed, tested, inspected and built around Munich. Aventa roof-mounted air conditioning systems are therefore, as ever, made in Germany.

The Aventa 2nd Generation product range update at a glance

The new roof-mounted air conditioning systems ensure a pleasant temperature inside the vehicle as well as particularly quiet operation. The systems' low total weight, made possible by the installation of state-of-the-art technologies, is a highlight. They weigh up to 18% less than the previous model. In addition, the infinitely variable compressor ensures outstanding cooling performance and, in combination with the revised Night Mode, quiet nights. The user-friendly air distributors also function as a design element in the vehicle.

Cooling power

Outstanding cooling power: Available in 1700 W (Aventa compact 2nd Generation), 2200 W (Aventa compact plus 2nd generation) and 2500 W (Aventa comfort 2nd Generation) operating levels, they can both cool and heat thanks to their integrated heat pump.

Weight

Outstandingly low weight: The systems weigh 23.2 / 24.2 / 28.7 kilograms, including the indoor air distributor. They weigh up to 5 kg less than the previous generation, which were already the lightest systems of their kind. Their cooling power is as powerful as usual despite the huge reduction in weight.

Technology

Innovative technology: Thanks to the new infinitely variable compressor and the new infinitely variable indoor ventilator, your perfect feel-good temperature is always guaranteed. The compressor is automatically adjusted as required. For more peace and quiet at night, there is the improved Night Mode, which allows the system to provide pleasant coolness with particularly low noise. If it does get too chilly, the integrated heating function guarantees comfortable temperatures. The systems also stand out for their low starting current. This means there are no problems at campsites with low fuse protection.

Usability

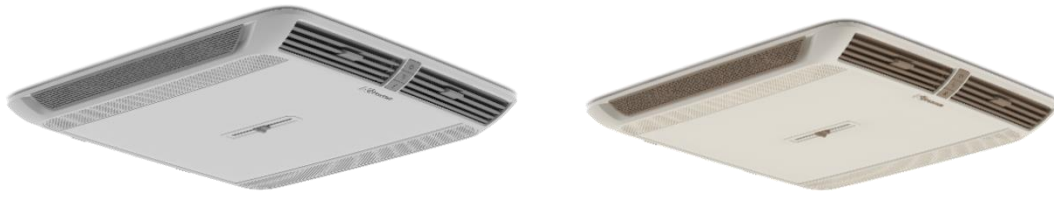

Easy to use: The devices can be easily operated with the help of a Bluetooth remote control. They can also be controlled by one of the Truma iNet X System panels, as well as by the app of the same name. The 2nd generation Aventa roof-mounted air conditioning systems can also be operated by a new Truma CP Plus.

Design

Timeless design: Both colour options are a real eye-catcher on the roof. Their elegance captivates on both the inside and outside.

Air distributors

Space-saving as usual: At 45 mm, the new interior air distributor has the usual space-saving design to maintain the leisure vehicle's clearance height. It comes in the colours 'cappuccino' or 'stone'. In addition to the basic Aventa air distributor variant, there is also the Aventa Premium air distributor. The Premium version offers an integrated dimmable LED for a pleasant lighting ambience, as well as air outlets with a higher number of adjustment options.

BU: Aventa 2nd Generation inside air distributor in 'stone' and 'cappuccino'.

External unit dimensions:

	compact	compact plus	comfort
Length	786 mm	786 mm	1008 mm
Width	577 mm	577 mm	665 mm
Height	245 mm	245 mm	243 mm

Air distributor dimensions:

Length	550 mm
Width	497 mm
Height	45 mm

Performance data:

	compact	compact plus	comfort
Cooling power	1700 W	2200 W	2500 W
Power consumption in cooling mode (230 V)	3.3 A	5 A	4.9 A
Heating power (heat pump)	1200 W	1500 W	2000 W
Heating mode power consumption (230 V)*	1.55 A	2.1 A	4.2 A

Putzbrunn, August 2024

About the company: Almost every camper in Europe knows Truma. Since the company was founded by Philipp Kreis in 1949, Truma Gerätetechnik, which is part of the Truma Group, has offered accessories for caravans and motorhomes. In 75 years, Truma has developed into a successful international company that is still family-owned.

It all started with a gas lamp, which the company founder assembled himself in his living room. These days, Truma is a system supplier of heaters, air conditioning systems, hot water generators, manoeuvring assistants and gas supply for caravans. With the Truma iNet X System, digital networking is also increasingly finding its way into everyday camping – and the search for innovative ideas continues every day. It also helps that many of our employees are also passionate campers: they not only develop products, they use them too. It is precisely this passion and identification that makes Truma successful.

Truma Group develops and manufactures at the Putzbrunn site near Munich and has subsidiaries in the UK, Italy, Sweden, USA, China and Australia. Almost 1,000 employees worldwide do their best every day to offer customers reliable premium products and excellent service.
