

Press release

CombiNeo presentation at Caravan Salon 2025

Renowned OEMs have already opted for the new heater

CAPTION: Truma's new CombiNeo 2in1 heater for motor homes and caravans

Putzbrunn, Germany – 13th August 2025 – At this year's Caravan Salon, which starts 29 August 2025, Truma, Europe's leading provider of technical system solutions for the caravan and motorhome industry, will be showcasing one of the trade fair's highlights with its new CombiNeo heating solution. The new heating solution, which was unveiled earlier this year, offers exciting innovations in hot water supply. The instant water heater principle makes endless* showers possible. This means that everyone can enjoy a hot shower after just eight minutes of heating time – regardless of how many people want one. Another advantage: Hot water is ready at the push of a button in just three minutes, perfect for quick tasks like washing dishes. Planning ahead thus becomes a thing of the past.

*Hot water in 3 minutes, hot shower after 8 minutes heating time in gas and hybrid mode with a temperature difference $\leq 25^{\circ}\text{C}$ (e.g. tank 13°C – shower temperature 38°C) and a water flow rate of 3.5 litres per minute, limited by supply of gas, electricity and water and lifespan of the product.

Gas, electricity or hybrid operation

The CombiNeo offers maximum heating flexibility, as it can be operated with gas, electricity or in hybrid mode. In pure electrical mode, it delivers a heating power of 3 kW – ideal for saving gas and easily managing many everyday situations such as maintaining warmth in winter. It operates particularly quietly and is completely emission-free. When you need maximum performance, use the hybrid mode: here, the CombiNeo combines gas and electricity to achieve a heating power of up to 7 kW.

Comfort, quality and reliability

When developing the CombiNeo, Truma primarily responded to feedback from the caravan and motor home community. In addition to reliability and efficiency, a quick and continuous hot water supply is particularly in demand. During development, emphasis was also placed on a compact design that saves space and weight. Another focus was on quality and reliability. A range of rigorous tests were carried out to ensure that the CombiNeo provides reliable long-term heat even in adverse weather conditions. Truma is convinced that CombiNeo will exceed customer expectations and set a new benchmark in the industry.

First OEMs opt for CombiNeo

Truma presented the CombiNeo for the first time in February as part of the Caravan, Camping and Motorhome Show at the NEC in Birmingham. Truma was able to attract the renowned British vehicle manufacturer Auto-Sleepers for an exclusive pre-launch. At the Caravan Salon, Truma can now announce collaborations with other renowned manufacturers who are also set to install the CombiNeo in their vehicles. These include Frankia (Germany), Autotrail (Great Britain) and Autostar and Notin (both France). Frankia and Notin are already presenting vehicles with the CombiNeo at the Caravan Salon 2025.

CombiNeo

Technical data

		CombiNeo 6 E		CombiNeo 4 E
Energy sources		Gas (propane / butane), electrical power		
Rated heat output	Gas mode	Room heating	1.8 / 4.4 / 6.0 kW	1.8 / 4.4 / 6.0 kW
		Water heating	Max. 6.0 kW	
	Hybrid mode	Room heating	Max. 7.0 kW	Max. 5.4 kW
		Water heating	Max. 7.0 kW	
	Electrical mode	230 V	1.0 / 2.0 / 3.0 kW	
Power consumption	Electrical mode	230 V	4.4 / 8.7 / 13.1 A	
Water heating time	Gas / hybrid mode	Washing up	3 minutes	
		Endless* showers	8 minutes	
	Electrical mode	Washing up	3 minutes	
		Showers	12 minutes	
Weight	without water, with periphery**			14.6 kg
Dimensions	L x W x H			518 x 367 x 200 mm

* Hot water in 3 minutes, hot shower after 8 minutes heating time in gas and hybrid mode with a temperature difference $\leq 25^{\circ}\text{C}$ (e.g. tank 13°C – shower temperature 38°C) and a water flow rate of 3.5 liters per minute, limited by supply of gas, electricity and water and lifespan of the product.

** Control panel, water set, hoses, end of the cable, cover, fastening material

About the company:

Almost every camper in Europe knows Truma. Since the company was founded by Philipp Kreis in 1949, Truma Gerätetechnik, which is part of the Truma Group, has offered accessories for caravans and motorhomes. In 75 years, Truma has developed into a successful international company that is still family-owned. It all started with a gas lamp, which the company founder assembled himself in his living room. These days, Truma is a system supplier of heaters, air conditioning systems, hot water generators, manoeuvring assistants and gas supply for caravans. With the Truma iNet X System, digital networking is also increasingly finding its way into everyday camping – and the search for innovative ideas continues every day. It also helps that many of our employees are also passionate campers: they not only develop products, they use them too. It is precisely this passion and identification that makes Truma successful.

Truma Group develops and manufactures at the Putzbrunn site near Munich and has subsidiaries in the UK, Italy, Sweden, USA, China and Australia. Almost 1,000 employees worldwide do their best every day to offer customers reliable premium products and excellent service.
